

AIRPORT MEMO

To: Chester County Area Airport Authority (CCAAA) Members

From: Gary L. Hudson, Airport Manager

Date: October 27th, 2010

Subject: Airport Hot Topics

For your review, below is a listing of issues affecting the Chester County/G.O. Carlson Airport (MQS).

NEW BUSINESS

- * **Tree Cut Down:** A dead tree on John Newton's property, which was leaning over in the direction of Aviation Way and causing a potential safety hazard was cut down on October 10th.
- * **East Drive-thru Gate Repaired:** On October 13th, the gate's electric eye failed to detect a vehicle that was driving through the gate. As a result, the "Driver" side of the vehicle was damaged after being struck by the gate as it proceeded to close. An electric eye was temporarily installed at the gate, due to the gate's loop detector being damaged. A new loop detector was replaced.
- * **Career Day:** On October 18th, I spoke to students at the Chester County Youth Center, regarding careers in Aviation and other fields.
- * **Lighting and Gate Repairs:** On October 24th: 1) The Pilot Controlled Runway Lighting circuit breaker had to be reset, and 2) the Aviation Way drive-thru gate had to be repaired, as a result of its electric eye sensor being knocked out of alignment.
- * **MQS Photo Shoot:** On October 26th, LangHu Clothing, which is a clothing store located in Philadelphia, PA, promoted part of their clothing line, by having their models take pictures in front of a tenant based aircraft. Universal Aviation Management Group, Inc. provided the aircraft.
- * **Meeting with Concerned Citizens:** On October 27th, I met with a Sadsbury Village couple, who had questions and concerns about MQS's airport operations and the proposed Runway Relocation/Extension project.

OLD BUSINESS

- * **Snow Blower:** Electrical system issues (charging system) have been resolved.
